QR ATTENDANCE

TASKBOARD

Product Backlog	In Progress	Completed
User Story: As a Lecturer, I want to start a class session so that a unique QR code is generated for students to scan. **Use case:** Session Initiation **Sprint 1** **Task:** Design a "Class Start" dashboard interface. **Task:** Develop the Dynamic QR Logic: Generate a cryptographic hash (token) that refreshes every 15–30 seconds to prevent unauthorized sharing **Task:** Create a Session entity in the database to track start time, end time, and module ID. **Sprint 2…** **Task:** Implement a backend service to fetch the current lecturer's assigned modules. **Task:** Create a Session entity in the database to track start time, end time, and module ID. …	IN PROGRESS	
User Story 2 As a Student, I want to scan the displayed QR code so that my attendance is logged instantly. **Use case: Attendance Submission Sprint 1** **Task:** Implement a "Scan" feature using the device camera (e.g., react-qr-reader or ZXing for Android). **Task:** Develop the logic to prevent "Double Scanning" (ensuring one student cannot scan twice for the same session) **Sprint 2** **Task:** Build a validation API that checks the scanned token against the active session in the database.
